

## Success Stories

### Core Modernization with Migration to Microsoft Azure and M365

#### Critical Business Challenge

Started our partnership with the Exec Management team (CEO and CIO) with nothing but a business plan.

The client required rapid digital transformation with massive data migration to improve productivity and efficiency across their product portfolio.

**Grew by \$195M**

#### Partnership

Quess GTS provided an upgraded platform for improved operational efficiency and time to market. Requirements fulfilled: set up a new division, deploy platform components, a front-end policy management system, and Managing support.

#### Solution

- The platform has enabled growth to \$195M in-force and was brought into production in 120 days
- Integrated Bermuda operations and US based headquarters
- Designed a highly virtual IT operations with a "Secure" Cloud First core philosophy.
- Designed and built a Corporate Azure Cloud and M365 environment(s)
- Provided a Variable expense model to support costs only as the company grew and we supported them from 10 employees to the high of 489 employees and consultants.
